Unit Keys

Length, Width and Height Keys (NOT AVAILABLE ON TRIC MODEL #4080)

4.10.1.11111	
Length	Enters length for calculation of area or volume.
Width	Calculates area, square-up

and perimeter. Calculates volume, wall Height area and total room area.

Circle/Arc Keys Circ Circle — Calculates circle area and circumference.

Calculates Arc Length or Degree, chord length, seg-

ment area, pie slice area, segment rise, and length of arched segment wall studs.

POCKET REFERENCE GUIDE - 2

Construction Project Keys

Conv Conglin Blocks/Bricks — Finds the number of blocks or

Radius — Enters or calculates circle radius

bricks for a given area and

Conv Arc

Conv Circ

stored block/brick size.

Stor 4 — Stores block or brick size (default: 128 Square Inches area and 16 Inches length).

Board Feet — Enters or converts cubic values to Board Feet.

Board Feet.

Compound Miter —
Calculates (based on entered spring and wall corner angle) miter angle, and bevel angle for cutting

Column/Cone —

Calculates the volume and surface area of a Column and/or Cone.

POCKET REFERENCE GUIDE — 3

Conv Height Drywall — Calculates number of 4 x 8, 4 x 9 and 4 x 12 drywall sheets based on entered or calculated area.

Conv Width Footing — Finds quantity of concrete, based on entered wall length and extend footing a year.

stored footing area.
Sor 6 — Stores footing area (default: 264 Square Inches).

Conv Diag

Roof — Calculates roof area, number of roof squares and bundles, and number of 4 x 8 sheets based on an entered or calculated plan area.

Conv Run Polygon — Calculates full

calculated plan area. **Polygon** — Calculates full angle, bi-sect angle, side length, perimeter and area based on entered radius and number of sides. **Studs** — Calculates num-

ber of studs based on

stored On-center spacing and entered length of wall.

Conv 5

mgonomen	ic reys (TRIG WODEL #4000)
Sine	Finds the sine of a degree or undimensioned value.
Conv Sine	Arcsine (sin⁻¹) — Gives the angle for the Sine value.
Cos	Finds the Cosine.
Conv Cos	Arccosine (cos ⁻¹) — Gives the angle for the Cosine value.
Tan	Finds the Tangent.
Conv Tan	Arctangent (tan⁻¹) —
